finist wrote on Thu, 13 November 2008 12:44Hello,

BTW, can you please share your experience - how many oopses due to exploits have you got for some period of time? (+ how many nodes there were total and how often did you upgrade kernels on them).

Thank you!

Thanks you very much for your fast answer, the exploit is public

and there's actually no patch for the moment ([hxxp://www.securityfocus.com/bid/32154](http://www.securityfocus.com/bid/32154))

This exploit call a panic instantly, and no login is done in dmesg/syslog/messages on the container and on the main box.

Regards
