I've run /sbin/iptables-save on my server (Ubuntu 8.10) which seem to work.
I get the following output:

Generated by iptables-save v1.4.0 on Tue Nov 25 08:06:33 2008
*filter
:INPUT ACCEPT [125:13040]
:FORWARD ACCEPT [58:4673]
:OUTPUT ACCEPT [96:12110]
COMMIT
Completed on Tue Nov 25 08:06:33 2008

I ran the iptables-save on my workstation @ work (Ubuntu 8.10), which gave me this output:

Generated by iptables-save v1.4.0 on Tue Nov 25 08:06:03 2008
*filter
:INPUT ACCEPT [1017917:1038266678]
:FORWARD ACCEPT [0:0]
:OUTPUT ACCEPT [721641:134562042]
COMMIT
Completed on Tue Nov 25 08:06:03 2008

So it seems to work? Unless theres a bug in Ubuntu ?
