Subject: Re: 1 logwatch to rule them all Posted by jpastore on Tue, 02 Dec 2008 20:28:27 GMT View Forum Message <> Reply to Message

Oh that's a very interesting idea. Thanks I don't know why I spaced on using syslog like that.

Doesn't logwatch monitor services not controlled by syslog? or do I need to configure those service to log to syslog and call it a day?
