gjanssens wrote on Tue, 09 December 2008 16:48: Meanwhile I have discovered that my isp uses greylisting for it's mailservers, which will cause a mail delivery delay in some cases. I suppose that's why my most recent attempt to get a bugzilla account took longer than normal to arrive.

That is clearly seen from the logs that I quoted. First delivery attempt got a "try again later" reply, and then the second attempt (in about 40 minutes) succeeded.
