Hi There

When I try to migrate a VPS from one server to another (source: 2.6.24-6-fza-amd64, destination: 2.6.18-12-fza-amd64) with the command

```
vzmigrate --online vzhost02 101
```

the following error appears:

```
vzhost01:/vz# vz migrate -v --online vzhost02 101
OPT:-v
OPT:--online
OPT:vzhost02
Starting OpenVZ is running...

vzquota : (error) Quota is not running for id 101
```

The guest os is just a plain debian from the template `debian-4.0-amd64-minimal.tar.gz` with an `apache2` installed and running).

Would be great if you can help us!

Thank you a lot in advance

Remo
