Hi

For some reason, Open-VZ is not starting automatically.

After rebooting the server, I always need to run this line

```
/etc/init.d/vz start
```

I am running:

```
vzctl version 3.0.22-1dso1
```

On this system:

```
Linux Debian-40-etch-64-minimal 2.6.18-12-fza-amd64 #1 SMP Sun May 18 09:57:TC 2008  
x86_64 GNU/Linux
```

How can I make it restart automatically?

Best Regards in Advance
