finist wrote on Thu, 20 November 2008 01:58Hi,

2.6.18-028stab057.2 is not the latest OVZ kernel available at the moment:

<http://download.openvz.org/kernel/branches/rhel5-2.6.18/028stab059.3/>

So, please, try it and report back if your problem is solved with the new kernel or not.

I think i have the same problem but on kernel 2.6.18-028stab056.1 (not rhel, as i need it for debian).

It's latest stable, not rhel, kernel, so i think i need that patch.

Edit:

On openvz config, it compiles without error.
