Hi,
Here is my System Setup

Pentium III 900 MHZ
512 MB Ram
HDD1: 160GB
HDD2: 10GB
HDD3: 80GB

Partitions:
HDD1: 150GB /srv ext3 10GB Swap
HDD2: 10GB / ext3
HDD3: 80 GB /mount xfs

I've got all vServers Running in the 150Gig Partition.
I want to add the 80Gig Drive too an VPS 250 which shall be an fileserver containing samba etc.
The Problem is, how do i add it?

Thanks for your help.

Chris
