---

You are right about posting my particular instructions on the wiki, but right now, I'm strapped for time.

My thought came up, while gleaming through some of the Howto's on the wiki.

If anyone is interested in posting it for me, I will gladly send it for inspection, and criticism.

I'm not one for seeking my moniker on a web site.

I just try to share my experiences with those, who may be seeking alternative methods, in using OpenVZ.

Thanks for responding.
