After I had deployed OpenVZ on several CentOS 5 systems, I was kinda disappointed that the included libvirt was too old to provide support. Therefor I have built a new(er) package which can be deployed on EL5 compatible systems. Details can be found at:

<http://blog.gbraad.nl/2009/02/libvirt-for-rhel5centos-5.html>

I hope this is useful for others.

Gerard
