Hi,

When I use vzyum cmd I get:

```
#vzyum 511 install yum
exec /usr/share/vzyum/bin/yum -c /vz/template/centos/4/i386/config/yum.conf --installroot
/vz/root/511 --vps=511 install yum
Setting up Install Process
Setting up repositories
centos4-vz-addons      100% |=====| 951 B  00:00
```

At this point it's freezes and no continue.

Any ideas how to solve ?

TIA.
