Subject: Re: Debian <> 3ware <> kernel 2.6.18+
Posted by TheStig on Thu, 19 Feb 2009 23:26:57 GMT

are the kernels you tried from the repository at
http://debian.systs.org/ ?

i had a debian kernel vmlinuz-2.6.18-ovz-028stab051.1-smp up and running with the 3ware9650 (i
ran ubuntu on it).
now i'm using 2.6.22-ovz005 which i believe i got from
http://wiki.openvz.org/Download/kernel/2.6.22/2.6.22-ovz005. 1
and it also works fine.
i've already installed the kernel ubuntu offers, but i haven't got to test them properly (but they
found the 3ware controller). ubuntu also offers amd64 kernels.

best regards...
