Subject: Quota shows more usage than its really being used.
Posted by zega on Mon, 23 Feb 2009 13:15:15 GMT

Hi there,

Its a weird issue with FS usage inside VE.

Take a look:
sovm103:/# df -h
Filesystem   Size Used Avail Use% Mounted on
simfs   2.0G 2.0G   0 100% /

It shows my FS totally full inside VE (100%, using 2GB).

But the real usage is:
sovm103:/# du -hs /
335M   /

Someone knows what can be happening here ? Where can I check for "ghosts files" ?
