A new revision in the script SETX86\_64-0.4 was made. The wikipage was also corrected in [http://wiki.openvz.org/Install\\_OpenVZ\\_on\\_a\\_x86\\_64\\_system\\_Centos-Fedora](http://wiki.openvz.org/Install_OpenVZ_on_a_x86_64_system_Centos-Fedora).

Some corrections were done according to these posts:

Install vzquota.x86\_64 ( [http://forum.openvz.org/index.php?t=msg&th=5595&#msg\\_34277](http://forum.openvz.org/index.php?t=msg&th=5595&#msg_34277))

Error in vzpkgcache ( [http://forum.openvz.org/index.php?t=msg&goto=31531&#msg\\_31531](http://forum.openvz.org/index.php?t=msg&goto=31531&#msg_31531))

Correction in centos-5 template ( [http://forum.openvz.org/index.php?t=msg&goto=32840&&srch=template+centos-5#msg\\_32840](http://forum.openvz.org/index.php?t=msg&goto=32840&&srch=template+centos-5#msg_32840))

Hope this helps.
