This is the arguments I used with strace:

```
strace -o gluster.out -ff glusterfsd -f glusterfs-srv.vol
```

I just did it again, and I have the same output file (I just renamed it).

This is the associated glusterFS log:

EDIT :

IT'S WORKS !!

The last command
vzctl set \$VEID --capability sys_admin:on

What do this command ?
