Quote:  
can you please be more clear?

Yes, of course.  
You don't need to create these records on the HN.  
The only command you have issue is: "vzctl set \$VEID --ipadd \$IP --save". In this case vzctl adds additional route on the HN - something like "192.168.4.171 dev venet0 scope link". Thats all.  
<http://wiki.openvz.org/Venet>
