Hi guys, i have a

AMD Opteron(tm) Processor 250 with 6 GB Ram, on centos 5.2 i install openvz, and like panel i use VTCONF.

i have only running 5 vps and are using 5GB ram, why? if each vps have max 512 ram.

what can be the problem?

EDIT** i kill 2 VPS and here is my ram info

Type	Value
Total RAM	5956.84 MB
Free RAM	2996.852 MB
Used RAM	2959.988 MB
SWAP	1983.992 MB
Free SWAP	1983.992 MB
Used SWAP	0 MB
Buffers	447.469 MB
Cached	2134.977 MB
Cached SWAP	0 MB
