Subject: Re: cPanel Quotas
Posted by dim on Thu, 01 Jun 2006 11:46:59 GMT

In our VPS, when the sesond level quota is enabled, files /aquota.{user,group} are symlinks to /proc/vz/vzaquota/*/aquota.{user,group} files. They are created by vzctl on the VPS start. Seems that CPanel somehow brokes them, rewriting by the regular file.
Fixed for VPS 50.
