Subject: Need help creating a template from an ISO
Posted by sammy08 on Fri, 27 Mar 2009 10:16:34 GMT

Hello All,

I want to create a template from an ISO. I installed the system to a machine and was trying to follow this http://wiki.openvz.org/Creating_a_CentOS_5.0_Template without success.

The ISO is actually a complete system including the CentOS 5.2 OS and I want to convert it to work in VPS.

Any Help would be much appreciated.

regards,

Kabong08
