mekarih wrote on Thu, 02 April 2009 08:03hello  
i have install openvz and webvz...  
the problem is now, i cannot migrate the container using both of the tools....  
when do it in the openvz....  
the error said, you dont have vzmigrate command..  
do we need to install the vzmigrate command in the container...  
and one more thing, do we have internet connection in the container created...  
webVz also cannot migrate the container...  
can someone help me  
thanx...

Can you please start a new thread with this message. This post has nothing to do with the current thread.
