Hello,

have you tried using tcpdump?

Ping some host from inside the VE, at the same moment run tcpdump utility on venet0 interface inside VE, on venet0 interface on the HN and on physical interface on the HN.

Please, show also

- ip a l - from HN and from inside the VE
  - ip r l - from HN and from inside the VE
  - arp -n - from HN
  - make sure that iptables are off inside VE
-
