I have just created a container on my new node. Inside the container i get this output from df -h:

```
[root@manager ~]# df -h
Filesystem      Size  Used Avail Use% Mounted on
/dev/simfs      1.0G 521M 504M 51% /
none           4.0G  4.0K 4.0G  1% /dev
```

Is there a reason why none is mounted on /dev its is also 4.0G on the host node mounted on

```
tmpfs          4.0G   0 4.0G  0% /dev/shm
```

Is there a way to remove it from the container? i noticed on some templates (hypervm) its not shown.

Thanks in advance.
