Subject: Re: Ubuntu Jaunty VE is hanging during boot
Posted by maratrus on Wed, 08 Apr 2009 07:58:09 GMT

Hello Jim,

Quote:
Any one have a clue as to what's happening? It eventually gets past this but then hangs at

What does it mean hangs?
The provided output contains the following line:
Quote:
root   276   0 0 05:09 ?   00:00:00 vzctl: pts/0

So, as far as I understand you're able to enter that VE and invoke commands. So, VE is alive.

The line
Quote:
root   1   0 0 05:08 ?   00:00:00 init [2]

means that init in runlevel-2.
So, it worth checking if networking service should work at all in runlevel-2.
