Hi,

Quote:
Anyone have any ideas about why it didn't work with IP's from different subnets? I couldn't really find any good description in the wiki or online.

I can only surmise,
The principles of venet interface are briefly described here
 http://forum.openvz.org/index.php?t=msg&&th=7401&amp ;goto=35611#msg_35633

In case of different subnets vzctl might not put appropriate record into arp table.
To avoid this, please change NEIGHBOUR_DEVS variable in /etc/vz/vz.conf file to "all", for example, i.e

NEIGHBOUR_DEVS=all
