Hi,

i use Debian etch.
Kernel 2.6.18 028.18.1-2.6.18-12-1 from OpenVZ
vzctl 3.0.23-1dso1

I tested and have now more infos:
I have two Machines.
If the server some hours online i can't vzmigrate from one to the other.
If i restart the Server i can vzmigrate.
After this i can't migrate back until i restart the servers.

If i ifconfig eth0 down in my VE. The migration works fine without restart servers. But its not onlinemagration

thanks for help
lars
