Hi,

i use Debian etch. Kernel 2.6.18 028.18.1-2.6.18-12-1 from OpenVZ vzctl 3.0.23-1dso1

I tested and have now more infos:

I have two Machines.

If the server some hours online i can't vzmigrate from one to the other.

If i restart the Server i can vzmigrate.

After this i can't migrate back until i restart the servers.

If i ifconfig eth0 down in my VE. The migration works fine without restart servers. But its not onlinemagration

thanks for help lars
