if i use vzspli to create 8 servers,
and i add a new server, i become:

```
[root@ronny html]# vzcalc 3
Resource Current(%) Promised(%) Max(%)
Memory      0.16    105.00   105.00
```

?!

this is not normal, ok should be 15 - 20% but not 105 % ?!
thanks
Ronny
