Quote:I dont see the configure script in the vzctl directory.

this is because configure is auto-generated from configure.ac. You have to run autogen.sh (and have auto* tools installed).

Quote:Also i noticed vzctl-3.0.24 is not available even via git.
The vzctl.spec file shows 3.0.23.

It's because the current git is somewhere in between 3.0.23 and 3.0.24... and the last thing we do -- just before the release -- is changing version.

You can actually take vzctl-3.0.23-1.src.rpm, then unpack it, pick just one patch (http://git.openvz.org/?p=vzctl;a=commitdiff_plain;h=6b819fb6 0634a109200b7a749aa40d595fcd4895) and add it into vzctl.spec and rebuild it, if you know how to do that (nothing really fancy).
