kir wrote on Tue, 05 May 2009 05:44 Since you are using Virtuozzo why don't you ask their support?

Since you (gonna) use HyperVM why don't you ask their support?

EDIT: I think I already found a way to move 'em.

If I tar the private/root and send them over, then manually create the configuration files I  
\*SHOULD\* hopefully be okay.
