Subject: Re: Slackware 10.2 precreated template cache
Posted by kir on Tue, 06 Jun 2006 15:53:06 GMT

Thanks a lot for your contribution! I have put your template to
http://download.openvz.org/contrib/template/precreated/, so you can refer to this location from
your site to save the traffic.

I have renamed the template to slackware-10.2-i386-minimal to better suit our naming
conventions. I think it should work with vzctl, since there is a generic slackware.conf in
/etc/sysconfig/vz-scripts/dists/ directory. If it is not working, please file a bug to vzctl.
