Hi folks,

I need to create my own Debian 5.0 OS template.

According to;

http://wiki.openvz.org/Debian_template_creation

```
# debootstrap --arch i386 etch /vz/private/777 http://http.us.debian.org/debian/
```

Can the above URL work for me?

Whether replace etch with lenny running;

```
# debootstrap --arch i386 lenny /var/lib/vz/private/VE_number http://http.us.debian.org/debian/
```

???

Then run;

```
cat <<EOF > /etc/apt/sources.list
```

```
deb http://http.us.debian.org/debian lenny main contrib
```

```
deb http://security.debian.org lenny/updates main contrib
```

```
EOF
```

TIA

What will be the URL for Ubuntu 9.10?

B.R.

satimis
