Subject: Re: nfs caching/delay from within a container Posted by abulava on Thu, 14 May 2009 13:24:16 GMT View Forum Message <> Reply to Message

kclair wrote on Wed, 13 May 2009 18:03the nfs filesystems are mounted with --bind in the vps Do you mean that NFS mount points aren't mounted inside VE natively? I have a following setup: a web server in VE mounts a R/W NFS share from another physical server according to http://wiki.openvz.org/NFS#NFS_client

Works for me.
