---

Hi

I have compiled the kernel from source as per [http://wiki.openvz.org/Kernel\\_build](http://wiki.openvz.org/Kernel_build)

But I can find no information regarding installing  
vzctl-3.0.0-8 from source.

I don't suppose you could direct me to the instructions.  
Most of the applications I have installed ususally  
have an install or README in the source tar ball.

Thanks in advance

Stephen
