The most important (and i suppose the only thing we need at the moment for this issue) is a testcase.

If you find a testcase that reproduces this issue, please, file a bug and post it, otherwise please, don't worry about it, assume this is a warning. But if this issue can lead to any side-effects, e.g. hanging, crashing etc don't hesitate to file a new bug report into bugzilla

<http://bugzilla.openvz.org/>
