Hi,

First, sorry for my bad english.
On my VN, I have shorewall running with :
policy
fw   net   ACCEPT
fw   vps   ACCEPT
vps   fw   ACCEPT
vps   net   ACCEPT
net   all   REJECT   info
all   all   REJECT   info
interfaces
net   eth0   detect   norfc1918,routefilter,tcpflags,blacklist
vps   venet0   -   routeback
masq
eth0   venet0
zones
fw   firewall
net   ipv4
vps   ipv4
(if needed, I can post shorewall.conf)
My VN has a public IP, and all VEs privates ips.

Each time I create a new VE, so a new private ip, I can :
- ping VN from new VE
- ping new VE from VN
- ping others VE from new VE
- ping new VE from others VE
but I can't ping out (internet) from the new VE.
I spent a lot of time on that, and I found that I needed to restart shorewall to make it working.

Do you think it's possible to find something to change in shorewall config to not having to restart it
?

Thanks for your help (and for this fabulous tool).
