Subject: XFS project quota (prjquota)
Posted by scorp on Fri, 12 Jun 2009 16:04:31 GMT

Hi,

someone have managed to use xfs_quota for openvz containers? It is possibile?

http://linux.die.net/man/8/xfs_quota

I tried to limit the container private folder, but I am getting alot of:

xfs_quota: skipping special file /home/vz/private/101/bin/bzegrep
xfs_quota: skipping special file /home/vz/private/101/bin/pidof
xfs_quota: skipping special file /home/vz/private/101/bin/tcsh
xfs_quota: skipping special file /home/vz/private/101/bin/mt
xfs_quota: skipping special file /home/vz/private/101/bin/csh
xfs_quota: skipping special file /home/vz/private/101/lib64
[...]

And I am thinking that quota won't work.

Thanks.
