After updating linux-image-2.6.26-2-openvz-amd64 from 2.6.26-15lenny3 to 2.6.26-17 and rebooting the HN, /proc/sys/net/ipv4/ip_forward was on 0. Doing echo 1 > /proc/sys/net/ipv4/ip_forward fixed it in a hurry, but this should NOT happen.
