OK here is the solution for VPS.  
Please try following it worked for me.

1- First change the /etc/fstab file similr to as follows:

```
# This file is edited by fstab-sync - see 'man fstab-sync' for details
LABEL=/ / ext3,usrquota defaults 1
LABEL=/boot /boot ext3 defaults 1 2
none /dev/pts devpts gid=5,mode=620 0 0
none /dev/shm tmpfs defaults 0 0
none /proc proc defaults 0 0
none /sys sysfs defaults 0 0
LABEL=SWAP-sda2 swap swap defaults 0 0
```

2- change in the

```
/etc/sysconfig/vz-scripts/xxx.conf
```

```
setup it to QUOTAUGIDLIMIT="3000"
reboot
```

3- this command as well as in sequence :

```
quotaoff -av
quotaon -av
/scripts/fixquotas
```

it should solve the issue
