ich glaube ich muss /var/tmp/ mit in die LVM nehmen... ein symlink reicht nicht...

hier mal die erste LOG:

pxxx:~# mc

File: vzdump-111.log Line 1 Col 0 2601 bytes 100%

Jul 20 17:09:40 INFO: Starting Backup of VM 111 (openvz)

Jul 20 17:09:40 INFO: status = VEID 111 exist mounted running

Jul 20 17:26:06 INFO: Finished Backup of VM 111 (00:16:26)

...oder kann man vzdump ein /tmp Verzeichnis vorschreiben???  
(habe nix in dieser richtung gefunden)

LG. Chris
