

Ne znaiu o kakom Vserver idet rech, no tot o ktorom govoriu ya (2.0) schitaet i pagi i drugie resursy (tut trudno skazat' kto bol'she parametrov schitaet, ya prosto hotel obratit' vnimanie na to chto utverzhdat' chto VServer voobsche nichego ne schitaet bylo by ne verno)

```
# cat /proc/virtual/7777/limit
