ok, here's the work around:

```
my $rsyncopts = "--stats --numeric-ids --bwlimit=${opt_bwlimit}";
```

```
# changes
```

```
$rsyncopts = $rsyncopts." --exclude-from=/home/backups/exclude_vzdump.txt";
```

the txt file contains <VEID>/home/:

```
1094/home/
```
