Hi,

- Container sys architecture not supported, CT0 a i386; Container arch is amd64/x86_64
- Containter Template tree broken, init cannot be excute
- you doesnt provide any info how the backup's are created, maybe restore path not correct, should /vz/private/<CTID> and not /vz/private/<CTID>/<PATH>/

- provide info about:

```
# ls /vz/private/119/sbin/init
# file /sbin/init
# file /vz/private/119/sbin/init
# grep OSTEMPLATE /etc/vz/conf/119.conf
```

Bye,

Thorsten
