Subject: Re: WebVZ 2.0 is released
Posted by litto on Mon, 17 Aug 2009 12:54:47 GMT

Hello,
I have just installed a new node and webvz.
But unfortunaly, I have a problem with, probably, sqlite3 and vps_id table.

When I log into MyAddress:3000 and click to 'Containers'
I`m getting
'No such file or directory - /var/lib/vz/private/Warning:/etc/issue'

Seems like sqlite put 'warning' for vps_id.

I changed in app/controllers/application.rb
file = File.open("/var/lib/vz/private/#{vps_id}/etc/issue to VPS ID :
file = File.open("/var/lib/vz/private/100/etc/issue and it works.

In logs I see only query:

Processing ContainerController#list_vps (for 193.239.124.2 at 2009-08-17 11:55:45) [GET]
  Session ID: BAh7CzoMY3NyZl9pZCIINDhhYTA5ZmE2YWUwM2M2ZTlkM2UyMzU2MjBiZjAw
 MjM6D3Blcm1pc3Npb24iCmFkbWluOgx1c2VyX2lkaQY6CW5hbWUiEkFkbWlu
 aXN0cmF0b3I6DnVzZXJfbmFtZSIKYWRtaW4iCmZsYXNoSUM6J0FjdGlvbkNv
 bnRyb2xsZXI6OkZsYXNoOjpGbGFzaEhhc2h7AAY6CkB1c2VkewA=--ddfc43
c937ddab9242ccf1a16ee5c45eb2bf0111
  Parameters: {"action"=>"list_vps", "controller"=>"container", "status"=>"all"}
  User Load (0.001333)   SELECT * FROM "users" WHERE ("users"."id" = 1) LIMIT 1

and probably this query gives 'Warning' and mess up everything.

How can I fix this?

Regards.
