That is maybe the problem...

I don't really know how to configure mysql. It is a clear install with apt-get.

I have this in configuration file:

```
# Instead of skip-networking the default is now to listen only on
```

```
# localhost which is more compatible and is not less secure.
```

```
bind-address          = 127.0.0.1
```

I need to change this ?
