On vps :

```
cat /etc/resolv.conf :  
search 209.190.74.89  
nameserver 209.190.74.89
```

ifconfig :

```
ifconfig                                lo      Link encap:Local Loopback  
                                inet addr:127.0.0.1  Mask:255.0.0.0  
                                UP LOOPBACK RUNNING  
inet6 addr: ::1/128 Scope:Host          RX packets:0 errors:0 dropped:0

                                UP BROADCAST POINTOPOINT RUNNING NOARP MTU:1500  
Metric:1
```

on ifcfg-venet0:0 file in vps : NETMASK=255.255.255.255
before these, i've worked VirtualBox for creating vps, for windows and linux vpses, i set netmask
for them 255.255.0.0
also in ifcfg-venet0:0 file , gateway is not defined.

any solution please? vps is not pinging
