Subject: Re: Stale mtab entries following stop
Posted by maratrus on Sun, 30 Aug 2009 10:37:03 GMT

Hi,

does information about /dev/mapper/r5-mail is listed in /proc/mounts when VE is running?
If yes, then init scripts have to umount this mount point when VE is being stopped.
In this case a little problem seems to exist in OpenVZ. The record that is written to /etc/mtab on
the HN is never deleted.
