So... this works fine :

```
echo "deb http://debian.systs.org/debian lenny openvz" >>  
/etc/apt/sources.list.d/debian.systs.org.list
```

```
gpg --keyserver pgpkeys.mit.edu --recv-key C64120F1  
gpg -a --export C64120F1 | apt-key add -
```

```
apt-get update
```

```
apt-get install ovzkernel-2.6.18-amd64
```

My problem with the hard disk was a misconfiguration in the BIOS !
