Subject: Best method of backing up manually? firewall/security question as well.
Posted by vivithemage on Mon, 14 Sep 2009 18:05:45 GMT

One small question, what firewall should I use on a node? I usually use CSF :
http://www.configserver.com/cp/csf.html
on all of my servers, but I am not sure it is wise to use this on a VPS node?

Also, what is the best way to backup a server? Should I just RSYNC the root of the node? I'd like to save the configuration of the node itself as well. To reduce on re-setup time incase of a mechanical HDD/RAID failure.

In the event of a failed HDD/RAID, would I just RSYNC the files back up to the server, and boot the server?

Thank you for your wisdom OpenVZ .
