Hi,

see man page: "Disk quota parameters" and "Resource limits"

```
# vzctl set <CTID> --diskinodes <soft:hard> --save
```

in your case, as an example

```
# vzctl set 200 --diskinodes 400000:440000 --save
```

Btw, for disableing vzquota, inodes you can set soft and hard to "unlimited"

Bye,
Thorsten
