the HN can ping the container, HN ip is 192.168.1.100 and container ip is 192.168.1.101  
but

nmap 192.168.1.101

Starting Nmap 4.11 ( <http://www.insecure.org/nmap/> ) at 2009-09-24 15:50 EEST

Note: Host seems down. If it is really up, but blocking our ping probes, try -P0

Nmap finished: 1 IP address (0 hosts up) scanned in 0.215 seconds
